

Summary of activities in October 2011 in Salavan TTC

Japan Overseas Cooperation Volunteer Ms.Asuka MOMIYAMA

1. What I did

A) Training of teaching skill for student 8+3 and 11+2 elementary school

Mr.Suphoun, Mrs.Suliphone and I discussed about how to do training teaching skill. And we started training. Students wrote lesson plan and introduce the topics, aim, how to teach, and materials. Mr.Supan, Mrs.Suliphone gave some advice about for teaching plan for the students. I understood a little bit the students explained. And I gave advice for activity. I looking forward to seeing lesson of students and teaching the material for lesson.

B) Cleaning the laboratory and Advice for arrange things of experiment

There were many things which cannot be used in a laboratory and many things were covered with dust. I divided into the required thing and the unnecessary thing. Teachers of science office, students of science course and I cleaned many things and in the laboratory. I drew the picture on the outside of each box so that it might understand what is contained in the box, and I arranged on the shelf..

C) Observation Class

I observed Curriculum and Technology of Teacher technology 11+1 A / B classes. I taught the student how to fold origami. It is difficult for some students to fold origami.

D) Science festival at Savannakhet TTC

I took part in Science and Math festival in Savannaket TTC on October 4th. In the festival JOCV introduced activities of mathematics with students of Savannaket TTC. Many elementary and junior high school students came and it was absorbed in an arithmetical problem and game, I was glad. The JOCV's activity was reported by television and the newspaper.

E) Others

- I displayed a Japanese textbook of elementary school on the shelf and translated the table of contents into Lao language. I glad that some teachers ask some question and look the textbook. I think that I change the textbook once a month.

- I went to elementary school at Viankham with worker of World Concern and Mr.Supun. It is my first time to visit countryside and elementary school in Salavan. I'm interested the school of countryside. The teachers said that the

village is very poor and most of students don't come to school the dry season. I feel it is big problem.

- I went to observation kindergarten of TTC. The classroom is cleanly and there are many pictures.

2. Impression

1) Good thing

- ① I was glad that made a schedule for Training teaching method of students. And Mr. suphoun, Ms. Suliphone and I had a time to consult with science teachers about lesson plans. It was decided how it will advance.
- ② We moved out of the narrow office to the large office and I got my workroom.

2) Problem

- Students of 11+2 elementary school didn't come to classroom at 26th October.

3) Solution

- Ms.Suliphone told that a timetable was passed to a student and he was well-known to all students of 11+2 elementary school.

3. What I want do

- I want to make directions for use laboratory and put labels on the shelf.
- I want to advice experimental material to purchase.
- I want to make the material for teaching mathematics and science.
- I want to go to see elementary schools in Saravan. It is important for teaching student to see how matters stand.
