

Summary of activities in March 2012 in Salavan TTC

Japan Overseas Cooperation Volunteer Ms.Asuka MOMIYAMA

1. What I did

A) Teaching in Teaching Method of Mathematics for primary school

I took part in “Teaching Method of Mathematics for primary school” of Mr. Senhuck BUNMEE. I introduce a material and an activity for multiplication, division and a fraction. I explained how to use their materials, and ask some question for students due to think about aim of lesson. Mr. Senhuck explained what I want to say. So many students understood how to use material and meaning of lesson. I think some student falls below a junior high school graduate in scholastic ability. It is looking serious.

B) Teaching of Teaching Method of World around us for primary school

I took part in “Teaching Method of World around us for primary school” of Mr. Suphanh THEPHAVONGSA. We talk about a teaching plan before the lesson. I make material for physical experiment. I’m happy the material was useful in the class. When I have free time, I read the textbook due to think some idea for the class.

C) Observation of Teaching Method of Science for junior high school

I took part in “Teaching Method of Science for junior high school” of Ms. Suliphone SIVIXAY. In the class students practiced teaching lesson. I observed the lesson and I gave to students some advice. Students have not gotten teaching skill yet.

I think that in one lesson teacher must do one interesting activity. The stile that teacher gives some questions for students groups and students write the answer is not so good. Because a few students think the answer, many students do nothing. I think that the stile must change step by step.

D) Attending Wedding Party

This month I got some wedding card from teachers. I attended the wedding party of Mr. Tadtashin PHOUMASENG and Mr. Vorlada KHOUTHACHAN. I feel so happy because the bride and groom look like happy. And I’m glad to know how to celebrate marriage in Lao.

2. Impression

1) Good thing

- ① In the second term I can carry out my schedule just as planned.
- ② I knew Lao custom of celebrate marriage. I feel so happy.

2) Problem

- ① JICA was allowed to buy microscopes for Saravan TTC, and ordered them to shop in Vientian. When JICA paid accounts out, the company told that delivered the microscope to Saravan TTC on 19th March, but they didn't arrived here. And the company didn't send us when the microscopes arrived at Saravan yet.

3) Solution

- ① I cannot find the settlement of the problem. I don't know why the company didn't keep their promise.

3. What I want do

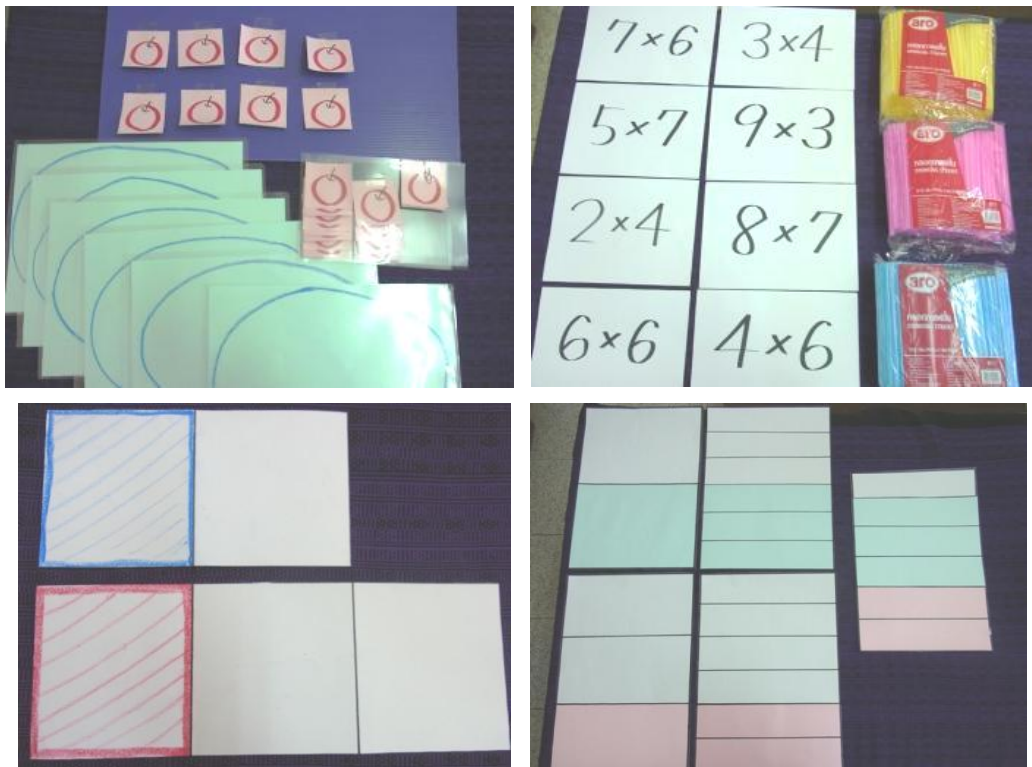

- I want to make the material for teaching mathematics and science.
- I want to study Lao Language more!
